

FASTENER GUIDE

MACHINE SCREW WASHER SIZES

FASTENER*SUPERSTORE*

Washer sizes correspond with the threaded fastener they are being used with. For example, a 1/4" washer will fit with a 1/4" bolt, and therefore has an inner diameter of just over 1/4".

Machine Screw Washers are made with smaller outside diameters to be used with machine screws. They are also used in applications where smaller diameters are needed.

Their outside diameter is typically about twice the size of the inside diameter.

IMPORTANT: Make sure to print this chart to Actual Size (no scaling).
